## EDUCATION

### HTML-CSS-JS | UDEMY

2022 – present

With a strong foundation in HTML, CSS, and JavaScript, acquired through certified courses on Udemy, I have the ability to create modern, responsive websites that meet current industry standards.

### REACT.JS | CODERHOUSE

2024 - present

I am currently a coderhouse student deepening practices in **React.js**

## PROJECT SUMMARY

### Salinera la Capital S.A

For the Company I have developed a landing page with **react**, developing components, and importing images locally, it was comfortable working with Aranza Isea who collaborated with me in the area of Design and user interface

### Balance of expenses | Calculator

For my second Project I have created a calculator and an expense balance with **react.js** managing the states of the components with functions like `useState`, `useContext`, `GlobalState`.

### WeatherApp API

In this project I have programmed an app, to display the weather, and its characteristics, implementing a weather API, this project was created with **react.js**

### Shopping Cart

I have developed a shopping cart using the **JavaScript** library **React**. I implemented key functionalities such as adding and removing products, updating quantities, and calculating the total purchase, all with a focus on usability
